*IL-OB (OILBLOK)

This new method of industrial laundering is specifically used for garments with Red Kap's exclusive OilBlok Technology finish. Water temperatures of 140°F or less with a max temp of 150°F and cleaning agency with moderate pH (9.0 max) are used to remove heavy soil without negatively affecting the finish. As with Heavy Soil Industrial Laundering, accelerated fading, increased shrinkage and reduced service life may occur.
